No Lash Line System is an aerial placement product that revolutionizes the conventional cable installation process. The system can be used to install/maintain cable by connecting & pushing 5' No-Lash sections from one utility pole to another along bare strand or existing plant.

Applications:

- River Crossing • Railroad Crossing**
- Highway Crossing • Urban Congestion**

After installation, additional cable(s) can be installed by using the Rodder Guide Tool in the open air pipe line created by the No Lash Line System. Multiple cables can be easily inserted and grouped in the system.
