CFS-3 Fiber Optic Stripper

Tri-hole design for optimal stripping

1st Hole:

Strips 1.6-3mm Fiber Jacket to the 600-900 micron buffer coating.

3rd Hole:

Strips the 250 micron buffer coating down to the 125 micron glass fiber.

2nd Hole:

Strips the 600-900 micron buffer coating down to the 250 micron coating.

Lock to keep tool closed when not in use.

Performs all common fiber stripping functions.

Pre-set at factory, no adjustments needed.

Easy Instruction printed right on tool handle.

Compliant thermoplastic elastomer handle grip for comfort.

Will not scratch or nick fiber.

All stripping surfaces are manufactured to precise tolerances to assure clean, smooth strips.
